MEMORANDUM FOR: Executive Secretary, DCI Security Committee

STAT

FROM

:

SA/DCI/C

SUBJECT : Update of NFIB Rules for Physical Security
for SCI

1. This memorandum requests that the DCI Security Committee review the draft of the update of the 1973 uniform physical security rules, remove reference to APEX and proceed through NFIB review to promulgation by the DCI.

2. The basis of this request is the DCI instruction to me on 12 January, at the NFIB meeting, to proceed with implementation of specified SCI related actions outside of the APEX system.

3. Several other specific actions are authorized by the DCI's instruction. They are:

- Single personal history forms for background data for industrial employees nominated for SCI accesses.
- Improved mutual acceptance of access approvals.

The DCI's instruction also generally ordered efforts at more uniform application of "improved" common SCI security rules for physical, personnel and document security.

4. I would appreciate your consideration and nomination of responsive actions that might be accomplished or started in the near term. Whether such actions should involve other than SECOM personnel can be separately determined; the APEX mechanism is available for such use as seems appropriate.
